SUMMARY

Product designer with **8+ years** building digital products across web and mobile, the last **5 scaling B2B SaaS platforms**, currently as a Design Lead. Leads complex, end-to-end initiatives — from discovery to delivery — combining customer research, product analytics, product strategy, experimentation, and Design Systems to solve business problems at scale.

Focused on creating leverage through **systems rather than isolated features**: product direction, scalable interaction patterns, Design Systems, and applying AI to design workflows — partnering with Product, Engineering, and Customer Success to move activation, retention, and business outcomes. Drawn to complex, ill-defined problems where research, data, and systems thinking matter equally. Career began in physical products, with a consolidated transition into digital.

EDUCATION

Postgraduate Degree in Innovation, Design and Strategy Management — ESPM · 2022

Bachelor's Degree in Industrial Design — UFF · 2019

LANGUAGES

English — Advanced / Fluent | Portuguese — Native

EXPERIENCE

Cobli Fleet Management SaaS

04/2021 – Present · Remote

Product Design Lead (UX/UI)

08/2024 – Present

- Instrumented the **Design System as an AI skill** (Claude / AI Studio) and AI-native prototyping agents (Claude Code, Lovable, v0), reducing high-fidelity prototyping time **from 8 to 3 days**; workflow adopted across **98% of the platform**.
- Identified root causes of churn through customer research and product data and defined **“Basic Value,”** a minimum activation metric adopted by Product, Customer Success, and Supply — the share of MRR from stably activated customers rose **from 35% to 51%**.
- Defined the logic for an **AI-powered personalized onboarding**, generating **7,000+ CTA clicks** and raising Enterprise accounts with completed basic setup **from 52% to 86%**.
- Led the redesign of order and installation visibility — the biggest activation bottleneck identified in discovery — and the team behind the **AI scheduling agent**, bringing **40% of installation scheduling to self-service**.
- Redefined the **information architecture and navigation** of the main product, validating with A/B testing to improve discovery and adoption of key journeys.
- Defined the product's **AI strategy** within a dedicated Innovation & AI business unit, from development to launch, and owned design across Cobli's three product surfaces — the fleet manager web platform, the driver mobile app, and the installer mobile app — serving distinct user profiles (directors, operators, analysts, and field technicians).
- Led a **team of 5 designers** across two business units, with a career track (“Design Skills Level Up,” Tour of Duty model) and responsibility for **90% of hiring**, while influencing Product and Technology strategy in leadership forums (OKRs, strategic narratives, and design Golden Paths).

Senior Product Designer • Technical Leadership

02/2023 – 08/2024

- Structured **Cobli's Design System** from strategy to organization-wide adoption — building digital accessibility standards (WCAG) into the components —, establishing the foundation to scale product development and ensure consistency between Product and Engineering.
- Partnered with Product to identify engagement and retention opportunities through customer research and data analysis, leading the design effort that **redefined the information architecture and navigation** of the main product — paving the way for the platform redesign.
- Redesigned the customer support flow and designed the **triage chatbot** (Blip, with WhatsApp as the customer channel) for tier 1 and tier 2 support, and structured the platform's help center — simplifying first contact and expanding self-service.
- Led a **team of 3 Product Designers and 1 intern**, structuring onboarding and mentoring practices, and contributed to Design's OKRs and strategic narratives during planning cycles.

Mid-Level Product Designer

01/2022 – 02/2023

- Worked across the full product cycle — discovery, user testing, scoping, and handoff — closely with product and engineering, running **A/B tests and phased launches** with a direct focus on business impact.
- Built **Geofences**, a virtual-fencing solution for fleet managers to control areas, and redesigned the **fuel module**, integrating the fuel card into the Cobli ecosystem.

Junior Product Designer

04/2021 – 01/2022

- Collaborated on discovery, interviews, results tabulation, usability testing, and prototyping, and built **version 2.0 of the alert system** for real-time fleet safety management.

DT3sports E-commerce • Physical and Licensed Products

04/2018 – 04/2021 • Rio de Janeiro

Mid-Level Product Design Analyst

07/2019 – 04/2021

- Managed the **annual product roadmap**, including cost analysis and production tracking.
- Built partnerships with licensed brands such as **Ubisoft, Globo, Flamengo, and Campus Party**.
- Attended international trade fairs (Shanghai, Taipei) and factory visits in Asia.

Product Design Assistant • 04/2019 – 07/2019**Product and Graphic Design Intern** • 04/2018 – 04/2019

- Developed products and negotiated with suppliers, focused on quality control and deadlines; contributed to the brand rebranding. Previously, created digital layouts and artwork for e-commerce and social media, with first exposure to UX research.

Power Look Fashion • E-commerce

01/2018 – 04/2018 • Rio de Janeiro

Graphic and Web Design Intern

01/2018 – 04/2018

- Created assets for social media, email marketing, and e-commerce layouts.

KEY SKILLS

Discovery & Research Product Discovery • Problem framing • Qualitative and quantitative research • User interviews • Personas & JTBD • Journey mapping • Usability testing • Competitive benchmarking • Systems thinking

Product Strategy & Experimentation Product strategy • AI-powered products (deterministic logic + LLM, with guardrails) • Activation, retention & churn reduction • Funnel analysis (CRO) • Product & business metrics (NRR, NPS) and governance • A/B testing • Feature flags & phased rollout • Prioritization (RICE) • OKRs • HEART • Business cases • Roadmapping

Design & Design Systems Information architecture • Interaction design • Figma (Design System, low- and high-fidelity prototyping) • Design System as an AI skill (Claude / AI Studio) • AI-native prototyping (Claude Code, Lovable, v0) • Conversational flows & AI agent design • Content design / UX writing • Accessibility (WCAG) • DesignOps • PRDs

Leadership & Collaboration Technical leadership and team development • Mentoring • Recruiting • Cross-functional collaboration and stakeholder alignment • Critique facilitation • Design culture and processes

Tools & Data Figma • FigJam • Miro • Claude Code • Lovable • v0 • Mixpanel • PostHog • Segment • HubSpot • Microsoft Clarity • Hotjar • Typeform • Blip • Mastra AI • Jira • Linear • SQL (basic) • Databricks • Snowflake
